DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to an airflow control valve.

Group II, claim(s) 14-23, drawn to a valve body and cover.

Group III, claim(s) 24-38, drawn to a valve operator.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Claims 1-13 are directed to a valve where “the seat is located at an elevation at or below the uppermost edge of the inlet and the diaphragm is located at an elevation above the uppermost edge of the inlet”. It is considered that “the valve seat is located at an elevation at or below the uppermost edge of the inlet and the diaphragm is located at an elevation above the uppermost edge of the inlet” comprises a first “special technical feature”.

Claims 14-23 are directed to a valve body and cover that enable a predetermined torque to be reached but not exceeded when the two members are tightened together. It is considered that a predetermined torque to be reached but not exceeded when the two members are tightened together comprises a second "special technical feature".

Claims 24-38 are directed to an operator to close a valve, the operator having first and second sides performing different but related functions. It is considered that "operator having first and second sides performing different but related functions" comprises a third "special technical feature".

3. A telephone call was made to Mark Montague on April 21, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin A. Cartagena whose telephone number is (703) 308-5810. The examiner can normally be reached on M-F (7:30AM to 4:00 PM).

Art Unit: 3754
